

Homa Pandemic Prevention-Securing Working Environment

Q: What did Homa do to maintain workplace & production safety?

A: According to the covid handbook, Homa Crisis Coordination Task Force took the initiative to protect workplace safety, various measures were taken:

1. Large scale testing was implemented and approximately 9k employees were tested
2. Free and abundant protective supplies like face masks & hand sanitisers
3. Access and exit control, green codes only
4. Daily health monitoring
5. All-around cleaning and disinfection

Thankfully, Homa maintained zero infections. Our HR and general management team have played a crucial part in the anti-epidemic implementation and maintaining smooth industry operation.

The vaccination rate also increased. To date, more than 10,000 people in Homa have received at least the first dose of vaccinations, among which approximately 9600 people are fully vaccinated with 3 doses. The overall vaccination rate of staff has reached 98.33%.

With remarkable joint efforts taken, all our operations teams stay on track to provide full support at your disposal.
